PROFESSIONAL SUMMARY

MCA graduate and Python Backend Developer with hands-on experience building FastAPI REST APIs, SQL Server stored procedures, data validation, and encryption for large-scale data collection systems. Seeking a Python Developer or Backend Developer role to build secure, high-performance applications.

PROFESSIONAL EXPERIENCE

Project Technical Support - III (Programmer), ICMR-NINE 08/2026 – Present
Bangalore

- Engineered FastAPI REST APIs using Python and Pydantic to support cancer patient data collection across forms containing 300+ fields.
- Managed data pipelines and database routing to ensure reliable data flow across multiple databases.
- Implemented medical team-defined validation rules to improve data accuracy and integrity.
- Developed optimized Microsoft SQL Server stored procedures and encryption mechanisms to enhance processing efficiency and protect sensitive patient data

AI and ML intern, INNOV8 edutech 09/2025 – 11/2025
Coimbatore

- Learned fundamental concepts of AI and Machine Learning, including basic model understanding and data handling.
- Gained hands-on experience with 30+ AI tools for automation, content generation, and productivity. Completed internship primarily online with a 2-day on-campus training program.
- Developed analytical thinking and practical problem-solving skills using AI applications.

EDUCATION

Master of Computer Applications (MCA) 2024 – 2026
Bharathidasan University Thanjavur, Tamil Nadu

Bachelor of Science (B.Sc.) in Mathematics 2021 – 2024
Madras Christian College Chennai, Tamil Nadu

TECHNICAL SKILLS

Programming Languages
Python, Java, C, C++, JavaScript, SQL

Databases
SQL, MongoDB (NoSQL), CRUD Operations, Database Design

Concepts
Object-Oriented Programming (OOP), Data Structures, Automation Scripting, SMTP Email Integration

Web Development
HTML5, CSS3, JavaScript, Responsive Web Design

Data Analysis & Tools
Microsoft Power BI, Microsoft Excel, KoboToolbox (data collection)

Soft Skills
Analytical Reasoning, Critical Thinking, Problem Solving, Time Management, Written and Verbal Communication

CERTIFICATIONS

Power BI Workshop
OfficeMaster

Python Intermediate Course
EduBe

Microsoft Excel Course
LinkedIn Learning

Python and SQL (Basic)
Hacker Rank

PROJECTS

Book Loop – Community Book Exchange Platform
HTML, CSS, JavaScript, Database , Python
- Developed a web application that lets users list, exchange and donate books within their community.
- Built user accounts, book listing and request-handling workflows with full CRUD database operations.
- Designed a user-friendly interface and efficient data model to promote book reuse and accessibility.

Hall Ticket Generation System
HTML, CSS, JavaScript, SQL , PHP
- Built a web application to manage student records and generate exam hall tickets with secure, role-based login.
- Enabled students to view and download hall tickets and academic details; created an admin dashboard to manage records.
- Integrated database operations for reliable storage, retrieval and updating of student data.

Shutdown Notification System
Python, SMTP, openpyxl
- Created a Python automation script that detects system shutdown events and sends email alerts to prevent data loss.
- Used SMTP for automated email notifications and OS-level system calls for event detection.
- Delivered a lightweight, practical utility that runs in the background with minimal resource use.
